KYLE PELLERIN

kpellerin@bowdoin.edu • (603) 491-1496 • LinkedIn • Project Portfolio

EDUCATION

Bowdoin College, Brunswick, Maine **Expected: May 2026**
Bachelor of Arts in Computer Science and Environmental Studies
Relevant Coursework:
Computer Science: Data Structures, Algorithms, Artificial Intelligence, Computer Systems
Environmental Studies (GIS): Applications in GIS and Remote Sensing, Nature of Data, Building Resilient Communities
Awards*:* Maine GIS User Group Angela Stokes Award, Bowdoin College Fritz C. A. Kollen Grant, Bowdoin Club Alpine Ski Team Captain, Sokoloff Prize

WORK EXPERIENCE

onX Maps, Bozeman, Montana **June 2025 - August 2025**
Software Engineering Intern
- Engineered a dynamic authentication flow using Swift's modern concurrency (async/await) to securely authorize all data requests from the onX internal mapping tool, replacing a legacy static token system.
- Designing and developing a new suite of geoprocessing tools to enable users to dissect avalanche terrain

COBALT Team Zoestra, Portland, Maine
GIS Web App Design Intern **January 2025 - May 2025**
- Designed an R shiny based web app to model the shifting distributions of eelgrass in Casco Bay, Maine, over the past 30 years to assist with conservation and research efforts.
- Collaborated with stakeholders to create and implement a data upload system for the app, which employs user-collected field data to accurately monitor real-time dynamics in the eelgrass beds.

Bowdoin College, Brunswick, Maine
GIS Teaching Assistant (Incoming) **September 2025 - December 2025**
- Incoming teaching assistant for the *Building Resilient Communities* GIS Course.

Research Assistant **October 2023 - May 2025**
- Established a quantitative data analysis metric for evaluating the effectiveness of the Maine Governor's Office of Policy and Innovation for the Future's Community Resilience Program.
- Researched the relationship between municipalities' ability to apply for grants, expand their digital capacity, and increase community resilience. Presented findings at the *American Association of Geographers* conference.

Research Fellow **June 2024 - August 2024**
- Coordinated with peer institutions to create an index evaluating social vulnerability in Maine, and presented reports that helped inform Maine's LD-1 storm preparedness legislation.
- Utilized ArcGIS to spatialize results and interpret trends and findings, produced maps and data for the Maine Social Vulnerability Index Dashboard. Performed sector-based interviews and evaluated them using NVIVO.

Shared Harvest of Hopkinton, Hopkinton, New Hampshire **May 2019 - September 2023**
Founder
- Founded and directed a charity working with local farmers and gardeners to provide excess produce and eggs to local families in need. Coordinated with local resource offices and farmers to facilitate pickup and distribution.

PROJECTS

Assessing Geospatial Modeling in Determining Optimal Afforestation Locations for Carbon Sequestration
- Produced a modeling tool using ArcGIS Pro to facilitate the government-funded afforestation in Isafjord, Iceland, with a specific focus on optimizing the potential for future carbon sequestration.
- Authored the above paper that located two ideal planting sites which are now used as afforestation zones.

S&P Finance
- Collaborated with a peer to design and author a web application using JavaScript, CSS, and the React.js framework to provide financial information to students. Launched the website using Amazon Web Services.

SKILLS AND INTERESTS

Technology: Python, Java, C, Swift, ArcGIS (Pro and Online), GitHub, C++, Javascript, CSS, React.js, R, IT, NVIVO
Research: CITI Ethical Research Certifications, Conference Poster Presentations, Grant Memo Writing, Story Maps
Interests: Machine Learning, GIS, Climate Change, Community Resilience, Skiing, Agriculture, Data Science
